

Introducing the World's Most Advanced Social Software

Amazing features, Rock-solid security & Easy-to-use interfaces

MangoApps quick look.

There are many phones but only iPhone provides the integrated experience that makes it a joy to use. There are many social software solutions, but **only** MangoApps provides the complete social software experience. With its amazing feature-set, rock-solid security and easy-to-use interfaces, MangoApps is years ahead of any other software solution in the market.

1

MangoApps is the only enterprise social network that comes standard with a suite of business applications that seamlessly work together and are available everywhere - web, desktop, mobile & tablets.

Real-time instant messaging.

MangoApps provides a seamless integration of real-time presence and instant messaging (IM).

- See who is online, busy, idle or offline
- Chat & share files in real time
- Automatic IM archiving + Search
- Turn 1-1 IM into group chat
- Share personal IM link from anyone
- IM from mobile, tablet, desktop or web

[Learn more about Instant Messaging & Presence](#)

2

Enterprise microblogging.

Start a conversation. Create a poll. Share news, links, or files. View and reply to posts from coworkers across your organization.

- Short status updates
- Attach videos, files & links
- Threaded comments
- Ability to like updates & comments
- Share updates over email, Twitter or Facebook
- Create a quick poll
- Real-time notifications of updates
- Convert updates to tasks
- Bookmark status updates
- Access from mobile, tablet, desktop or web

Instant group chat & video conferencing.

Group chats and video conferencing are a great way to get everyone together in real time. Invite a client, colleague, or vendor to chat, collaborate, and make decisions.

- Video conferencing with up to 50 participants.
- Chat in real time with all project and group members.
- Group chats are saved and are searchable.
- Create ad hoc group chats
- Group chat from mobile, tablet, desktop or web

[Learn more about group chat & video conferencing](#)

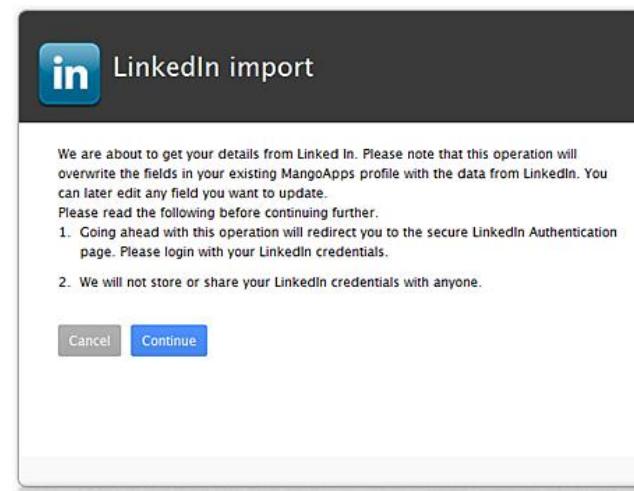

Rich colleague profiles.

Let others learn about your experience and interests by creating a profile that captures your expertise and shows colleagues across the company who you are and what you do.

- Import profile from LinkedIn
- See all of colleagues' activities from one place
- Learn more about your colleagues and follow them
- Office Card gives a quick snapshot
- Search colleagues' profiles
- View profiles from mobile, tablet, desktop or web

[Learn more about Rich Employee Profiles](#)

The screenshot shows a web-based application interface for managing groups. At the top, there's a navigation bar with links for Dashboard, Profile, Colleagues, Groups, Projects, Tasks, Files, Ideas, Events, and Apps. The main content area is titled 'MangoSpring' and shows a list of 'Groups'. Each group entry includes a thumbnail, the group name, the last activity (e.g., '2 hrs ago'), the number of members, the number of messages and posts, and a 'Chat Now' button. A 'CREATE NEW GROUP' button is located at the top right of the group list.

Control group discussions.

Create and join private or public groups to discuss work-related projects.

- Public, private, or secret groups
- Invite partners, customers, or co-workers
- Communicate using Group Huddle, Chat or Updates.
- Share files, links, and videos
- Create and share posts, wikis, polls
- Full group member and content management
- Turn groups into projects
- Create a group template
- Mobile, Tablet, Web or Desktop access

[Learn more about full-featured groups](#)

Easy document collaboration.

MangoApps is the simplest way to share any size business file from your desktop, browser or mobile.

- Upload & share up to 2GB file
- Organize files in folders
- Add metadata, description & tags, to files
- Share a link over email with partners
- Document version history
- Task management
- Document access log
- View over 300+ file types online
- Invite colleagues to collaborate
- Comment or organize a huddle around documents
- Advanced user permissions
- Search files & folders
- Full access from Mobile, Tablet, Web or Desktop

The screenshot shows the MangoSpring application's dashboard. At the top, there's a navigation bar with links for Dashboard, Profile, Colleagues, Groups, Projects, Tasks, Files, Ideas, Events, and Apps. The main area is titled 'MangoSpring' and features a 'Send Direct Message' button. On the left, there's a sidebar with 'My Activity' (I'm Following: 15), Direct Messages, My Wall, Sent, Mentions (@me), Watched, Network Activity (Send IM), and All Activity. The main content area has tabs for Update, Task, Project, Event, Group, Poll, and Idea. A text input field says 'What are you working on?' with an 'Attach' button and a 'Post' button. Below that is a 'Mark all as read' button and a 'Show: All Unread' dropdown. A list of updates is shown, with the first one being 'I created a new Task' titled 'Make a Peanut Butter and Jelly Sandwich' due on 'Not Specified' and status 'Not yet started'. It was posted 'about 3 hours ago from Web'. Below the update is a comment from 'Ian Hergert' in 'New Product Ideas'.
